Simple advanced comfort

Standard features of the ComfortNet™ system include dual fuel, outdoor temperature display, dehumidification, advanced diagnostics, a programmable continuous fan control, and more. The ComfortNet™ system is capable of alerting the homeowner, at the control or remotely*, via the internet when service is required on any part of the complete system. A wide assortment of features are available depending upon the ComfortNet™ communicating thermostat you choose.

Standard features:
» Selectable staging options

» Customizable service reminders

» Advanced modulation control

» Programmable heat pump balance point

» Auxiliary heat lockout

» 4-speed selectable continuous fan speed

» Full-color display

» On-board dehumidification and humidification control

*Internet Gateway required

For easy comfort and control from anywhere with an internet connection

Featuring the RedLINK™ Suite of Home Comfort Solutions

ComfortNet® CONTROL SYSTEM

Innovative Control

The CTK04's RedLINK™ wireless technology and its full suite of wireless enabled accessories help to best meet your personal comfort needs. Wireless accessory add-ons offer comfort, convenience and connection, and the ease of wireless installation means simplified installation capabilities now and in the future.

Internet Gateway

Connect the RedLINK™ Internet Gateway to any CTK04 thermostat to build your wireless system through Honeywell's free Total Connect Comfort Services website. Once registered, you have the ability to customize your system and alert settings, download free mobile apps and more through the Honeywell Total Comfort Connect portal.
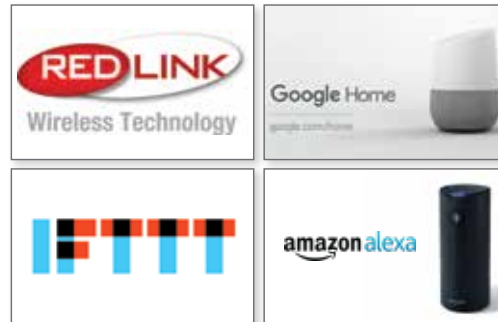

Works with the following Honeywell RedLINK accessories:

» RedLINK™ Internet Gateway / Total Connect
» Wireless outdoor and indoor air sensor
» Portable comfort control
» Entry/Exit remote
» Vent and filter boost remote
» TrueSTEAM humidifier with wireless adapter

Programming:

» Smart scheduling feature programmable to any lifestyle
» User Interaction Log provides a searchable history of setting changes
» Advanced staging control
» Heat and cool cycle rate adjustment
» Energy management recovery
» Keypad lockout options
» Dealer contact information options
» USB upload and download options
» Maximum heat and minimum cool set-point temperatures

Daikin and its design are trademarks owned by Daikin.

ClimateTalk™ is a digital communication standard designed specifically for residential applications enabling connectivity and interoperability of the home heating and cooling system. All ComfortNet indoor and outdoor controls and thermostats are designed using the ClimateTalk standard providing advanced, yet simple, system-wide communication, diagnostics and expandability.
